LinkedIn: linkedin.com/in/rayan-bensalem-42242a336

Portfolio: portfolio-alpha-orpin-26.vercel.app

Summary

Full Stack Developer specialized in building scalable, high-performance web applications using React, Next.js, NestJS, and TypeScript. Passionate about learning new technologies quickly and solving complex problems. Focused on developing secure, maintainable, and optimized applications that improve business efficiency, enhance user experience, and reduce operational costs through modern software solutions..

Technical Skills

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, Zustand, Tailwind CSS

Backend: Node.js, NestJS, REST APIs, GraphQL, Socket.IO

Database: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Docker, Postman, Cloudinary, Vercel, Render, n8n

Projects

Collaborative Whiteboard: Built a real-time collaborative whiteboard where users can create rooms, share links, and collaborate instantly. Supports freehand drawing, lines, rectangles, color selection, exporting the canvas, and real-time synchronization. Implemented with Redux Toolkit for state management and optimized rendering performance to reduce unnecessary re-renders while using Socket.IO for collaboration.

Intelligent File Management Platform: Developed a platform where students can upload, update, delete, and browse study files, visit user profiles, react to files (Like, Dislike, Report), manage playlists, receive real-time notifications, and use an AI chatbot. Built an admin dashboard for statistics and file approval/rejection. Implemented React Query caching, debouncing, rate limiting, Socket.IO notifications, database indexing, and Cloudinary.

Media Platform: Developed a full-stack social media platform with secure authentication, user profiles, post creation, updating and deletion, likes and comments, friendship invitations, user blocking, and real-time messaging. Built using GraphQL for efficient data fetching and WebSocket ([Socket.IO](#)) for instant chat and real-time updates.

Food Delivery: Developed a food delivery platform where users can browse menus, explore popular meals, and place orders. Built an admin dashboard to manage orders, users, menu items, and categories, providing complete control over the platform. Integrated AI automation using n8n to streamline business workflows and improve operational efficiency.

Education

Bachelor's Degree in Computer Science — University of Abou Bekr Belkaid(2025–2026)
